Long Whatton C of E Design & Technology Curriculum and SEND

"Design is not just what it looks like and feels like. Design is how it works," – Steve Jobs

In Design and Technology at Long Whatton we believe every child should have the opportunity to show their artistic flare in designing and producing functional products through the use of different materials and tools.

- Resources and equipment are adapted accordingly making it all accessible so all children can carry out the lesson as a whole class.

- We provide targeted teaching (if needed) ensuring pupils achieve specific goals where support staff are trained and fully aware of the steps needed to be successful,

- Lessons are structured into small steps so that any child can achieve through a positive learning environment.

- Children study different designers from different backgrounds, disabilities and needs to help the children to have positive role models.

- Design and technology is carefully structured across our two year rolling program with a wide range of subject matter to inspire all children.

- The design and technology road map has a clear progression across the school so that children can build on previous knowledge and skills to become confident designers.
